

## Data Collection

## Web Application

**Greta Franzini** - with occasional external contributions.  
[UCL Centre for Digital Humanities & University of Göttingen;  
g.franzini.11@ucl.ac.uk]

**Peter Andorfer** and **Ksenia Zaytseva**.  
[Austrian Centre for Digital Humanities, Vienna;  
Peter.Andorfer@oeaw.ac.at; Ksenia.Zaytseva@oeaw.ac.at]

2012-ongoing

2016-ongoing

To **identify best practice** in digital (scholarly) editing and provide a **record of extant digital (scholarly) editions**.

To **enhance the usability** of the Catalogue for desktop and mobile devices.

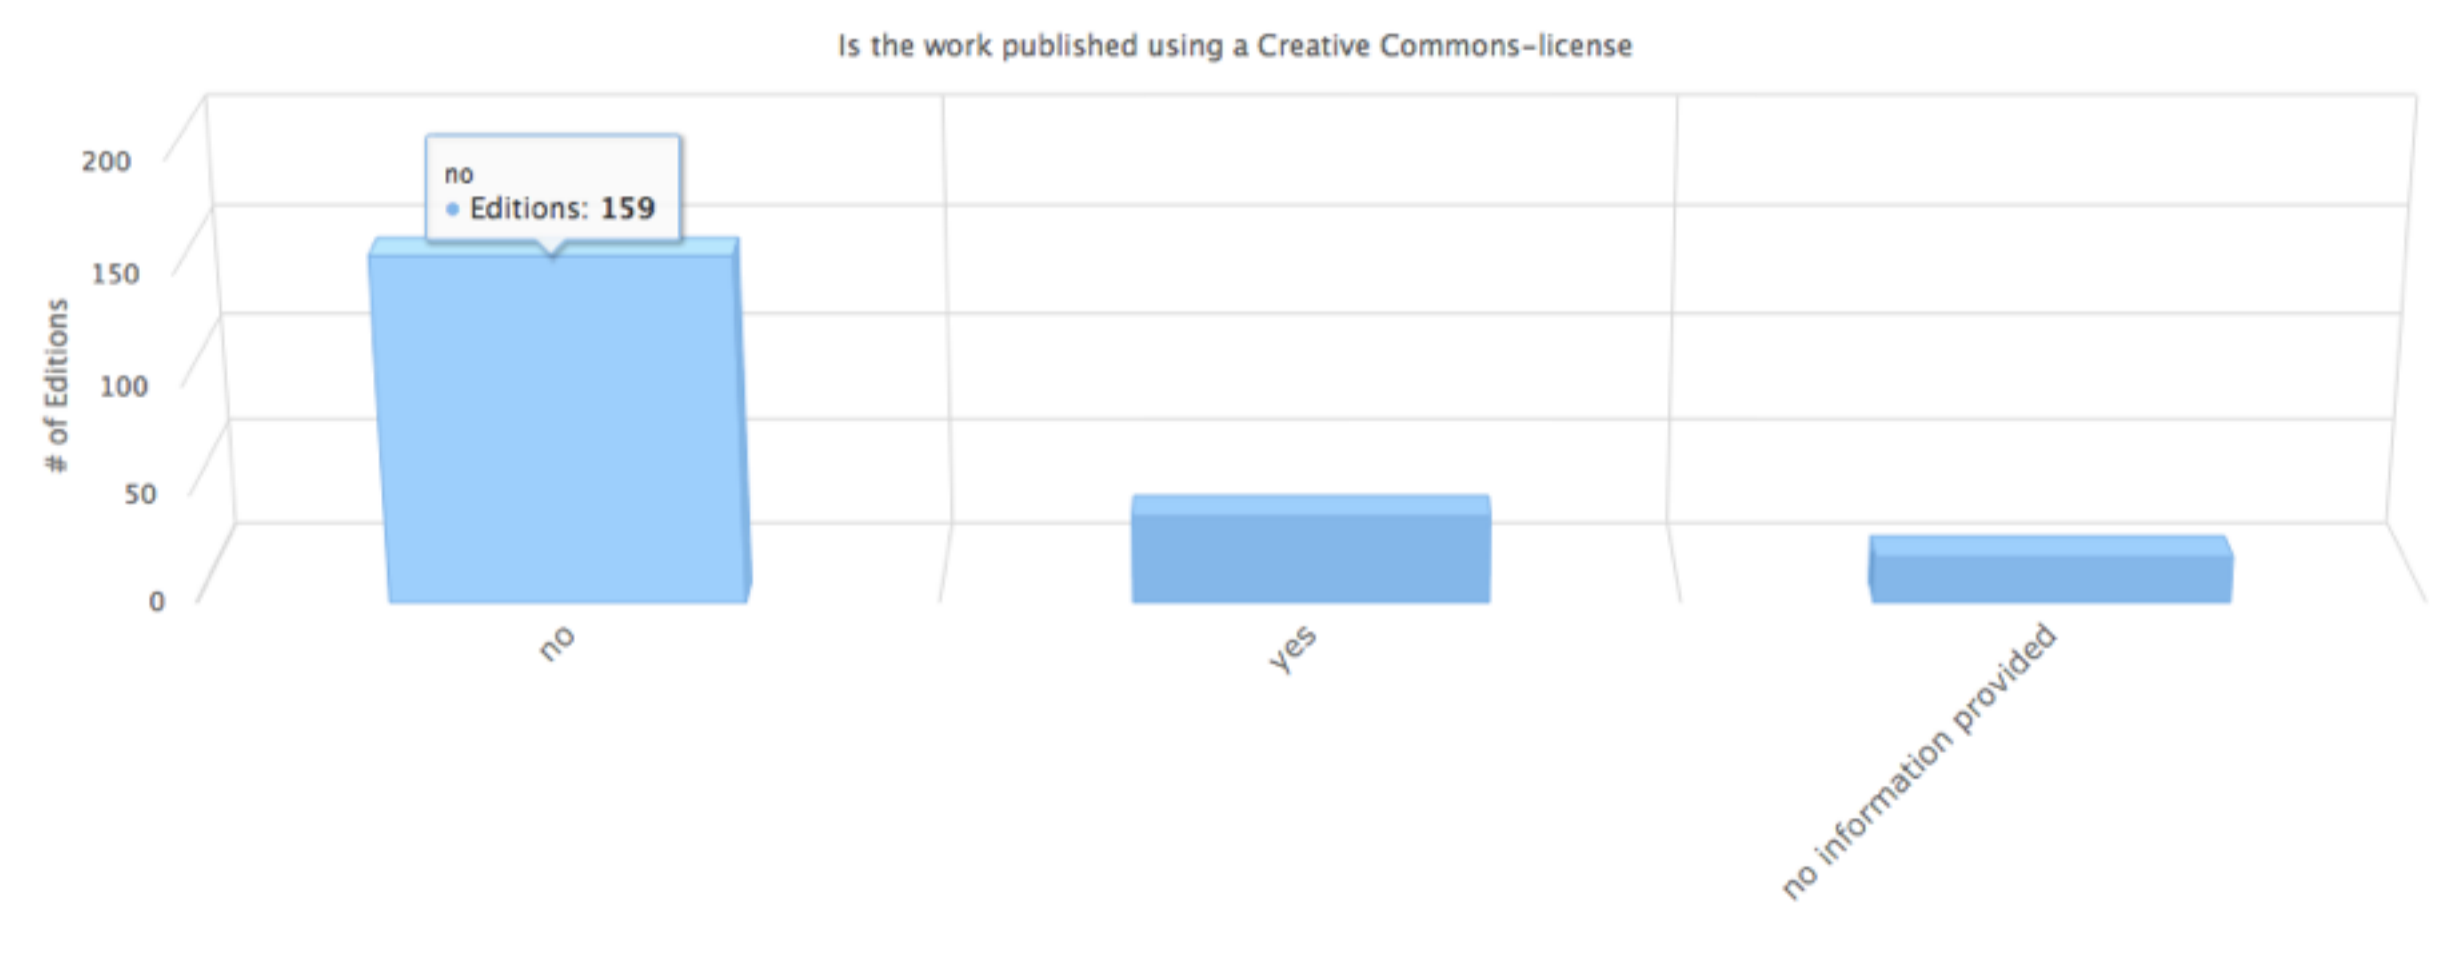

**Comma Separated Value** (\*.csv) file, openly available via **GitHub**. A wiki provides information about how the Catalogue is organised. Users may suggest editions for inclusion and can correct inconsistencies.

Python web framework **Django** and a **MySQL database**. Please consult the application's code repository on **GitHub** for the full technical documentation at [https://github.com/acdh-oeaw/dig\\_ed\\_cat](https://github.com/acdh-oeaw/dig_ed_cat)

**Detailed overview** of project features.

User-friendly browsing, interactive **visualisations** of the data, data enrichment and referencing (GND, Geonames), and an **API**.

Who? When? Why? How? What? Where?
